

GEOVANNY CORDERO VALVERDE

San José, Costa Rica

geovanny@pm.me

+506 8852 7576

Summary

Full-Stack Engineer with 5+ years of experience leading cross-functional teams and delivering scalable backend and frontend systems using Golang, Ruby on Rails, and Vue. Proven track record of improving delivery cycles, mentoring junior talent, and launching solutions that enhance performance and client satisfaction. Currently supervising apprentice development and driving architectural improvements as part of a long-term strategy to transition into senior leadership roles.

Core Competencies

Technical Leadership: Tech Lead , Project Management , Cross-functional Team Leadership (US/LATAM/APAC), Agile/Scrum , Apprenticeship Program Development

Full-Stack Engineering: Golang, Node.js, Ruby on Rails, .NET, Next.js, Vue/React, React Native

Cloud & DevOps: AWS (ECS, Lambda, RDS) , Docker , CI/CD Pipelines

Professional Skills: Problem Solving, Technical Mentorship, Emotional Intelligence

Work Experience

Pernix Solutions (July 2019 - Present)

Software Engineer III & Apprentice Program Supervisor

- Led end-to-end project development (requirements gathering, estimations, Agile execution, client meetings).
- Managed 3+ teams, ensuring technical excellence and mentorship for junior developers.
- Leadership: Conducted interviews, mentored 15+ apprentices advanced to junior developers and implemented structured onboarding that cut ramp-up time.
- Key Technologies:
 - **Golang:** Built and maintained robust GraphQL APIs (PostgreSQL, GORM, webhooks) for a healthcare client, seamless third-party integrations via custom webhooks. Used by 3+ client applications.

- **Vue.js and JS technologies:** Led the development of new client-facing features using Vuetify, TailwindCSS, and ChartJS, increasing product usability and adoption across multiple deployments.
- **Ruby on Rails:** Designed and delivered full-stack solutions (production ready) using both monolithic and microservices architectures, enabling seamless integration with third-party APIs and internal services.
- **React Native:** Delivered production-ready mobile apps (4–12 month cycles) and led full framework/library upgrades, ensuring performance improvements and uninterrupted business operations.

Client Engagements

BuildingLink (Jun 2025 - Present)

Embedded across a 400+ repository micro-frontend and microservice property-management platform — 380+ merged pull requests spanning 57 repositories in 14 months, and still shipping.

- Own the property/unit/occupant domain end to end while its legacy .NET service is being replaced by a new cloud, Postgres-backed implementation, keeping behaviour consistent for callers throughout the live migration.
- Delivered two complete modules — bulletin board and building directory — across backend microservice, Vue front end, and the shared generated API client, including authorization, moderation, and notification workflows.
- Maintain the platform-wide shared UI libraries consumed by dozens of downstream micro-frontends, where every change carries platform-wide blast radius.
- Diagnosed a recurring timeout in a high-traffic bulk-write path, and coordinated cross-cutting fixes that had to land simultaneously across six or more independently deployed repositories.

Technologies: Vue 3, .NET, TypeScript, PostgreSQL, Kafka, AWS, Docker

Careseekers (Aug 2020 - Sep 2025)

Sustained ownership of a home-care and support-worker scheduling platform for five years and through two full rebrands — 369 merged pull requests across its core Go API and Vue admin dashboard.

- Built and maintained the referral to shift to reminder workflow care coordinators run the business on: referral creation and attachments, multi-caregiver assignment, branch-scoped access control, and an OAuth login migration.
- Decomposed scheduled-job logic out of the monolithic API into dedicated Go microservices for webhook delivery, shift timing, and appointment reminders.
- Carried the codebase through two rebrands with commit history intact, updating CI, environment configuration, and organization references across a dozen-plus repositories each time.

- Kept the React Native support-worker app store-compliant, delivering a Go runtime upgrade, a React Native version upgrade, and an Android 15+ memory page-size compliance fix.

Technologies: Go, Vue.js, React Native, GraphQL, PostgreSQL, RabbitMQ, AWS ECS, Twilio

Pernix Direct Clients — Insurance & Legal Tech (Jul 2024 - Mar 2025)

Shipped production features for two of Pernix's own clients concurrently, in different domains and stacks: a live insurance-agency website and a legal-tech Word add-in.

- Built and shipped cajadeandeseuros.cr end to end — insurance product catalog, vehicle and civil-liability application flows, policy lookup, CMS-backed content, and a staging to production CI/CD pipeline.

- Built the citation-processing engine behind Benchly's Word add-in: Bluebook-format matching, table-of-authorities extraction, and case-citation grouping — the domain logic the product's legal review depends on.

- Alternated between the two engagements across the period, holding delivery on both a Rails/PostgreSQL site and a React/TypeScript Office add-in.

Technologies: Ruby on Rails, PostgreSQL, React, TypeScript, Tailwind CSS, Heroku, GitHub Actions

Sproxxy (Dec 2022 - May 2023)

Primary engineer on both sides of a sprint-driven B2B PR and speaker-engagement platform — 149 of 150 pull requests merged in five months, including a from-scratch API rewrite after an early stack pivot.

- Rebuilt the backend on Ruby on Rails after the initial Node/TypeScript prototype was abandoned in the first two weeks, delivering domain models, CRUD, authorization policies, and transactional email on the replacement service.

- Delivered the bulk of the Vue 3 and TypeScript front end: engagement, strategy-plan and task workflows, keyword management, and the product's pitch process.

- Built and maintained a third-party import for company and event data, reconciling an external feed that mapped cleanly onto neither side of the stack.

- Set up CI on both repositories plus backend linting and Cypress end-to-end coverage of authenticated flows, giving the team automated build and lint gates early in the engagement.

Technologies: Ruby on Rails, Vue 3, TypeScript, PostgreSQL, Pinia, Tailwind CSS, Cypress, CircleCI

HubClick (May 2020 - Oct 2020)

Took a home-services booking and job-management product from empty repositories to a repeatable white-label offering in five months — 92 of 94 pull requests merged across backend, mobile app, and web console.

- Built the backend API covering the full domain — users, companies, teams, quotes, services, jobs, and invoices — with authentication, permissions, and automatic invoicing on job completion.
- Shipped a React Native app serving three distinct roles (client, crew, admin) with booking, scheduling, invoice history, and profile management.
- Delivered a React web console for company onboarding, service configuration, and client invitations.
- Templated the app into branded per-client instances, turning a single product into a repeatable white-label offering for multiple home-services businesses.

Technologies: Node.js, Express, MongoDB, Redis, React Native, Expo, React, AWS

Technical Expertise

Frontend

Next.js, Vue.js, React Native, TypeScript, TailwindCSS, Vuetify, Performance Optimization

Backend

Golang (GraphQL/REST APIs), Node.js, Ruby on Rails, .NET, Microservices Architecture

Cloud & DevOps

AWS (ECS, Lambda, RDS), Docker, CI/CD (GitHub Actions, CircleCI)

Messaging & Integrations

Kafka, RabbitMQ, Twilio

Data Systems

PostgreSQL, MySQL, MongoDB, Redis, Query Optimization

Testing & Code Quality

Jest, Cypress, ESLint, Prettier

Engineering Leadership

Agile/Scrum, Technical Roadmapping, Code Reviews, Mentorship

Education

- *MBA in Project Management* – Universidad Estatal a Distancia (UNED) (In Progress)
- *Bachelor's in Computer Science* – Universidad de Costa Rica (UCR, 2019)

Certifications

- **INCAE Business School:** Crisis Management (2022), Gerencia con Liderazgo (2020)
- **Coursera:** Intro to Data Analytics (UC Boulder), Big Data (UC San Diego)
- Anthropic Education:** Claude 101 (2026), Claude Code 101 (2026), Claude Code in Action (2026)
- **UNED:** Soft Skills & Workplace Competencies (2023)

Soft Skills & Languages

- **Languages:** Spanish (Native), English (Fluent)
- **Leadership:** Coaching, Emotional Intelligence, Feedback Culture
- **Work Ethic:** Self-Learner, Problem-Solving, Agile Mindset
